***Claim Rejections - 35 USC § 112***

1. Claims 1-24 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. 1) storing securities market data in real time, 2) updating market data in real time, 3) storing bond data in real time, 4) forwarding the market data to others in real time, 5) issues names in real time, 6) coupons or maturities data in real time, 6) collecting data obtained from a query in real time, and 7) updating said query in real time.

***2. Claim Rejections - 35 USC § 112***

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

a. The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claim 1-24 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The limitation "in real time" is ambiguous.

The limitation "other types of securities market data" is vague and indefinite.

**5. Claim Rejections - 35 USC § 103**

6. Claims 1-24 are rejected under 35 U.S.C. 102(a) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Bloomberg Fact sheet.

7. The prior art teaches that an interactive financial information (a genus for all the species claimed) network. A representative fact sheet of the Bloomberg system is attached. The examiner takes official notice that this system comprises a storage means, controller means, and data terminal means. The claimed and prior art products are identical or substantially identical in structure, but the reference fails to expressly teach of capturing and disseminating the data in "real time". Nevertheless, a prima facie case of either anticipation or obviousness has been established. In re Best, 562 F.2d 1252, 1255, 195 USPQ 430, 433 (CCPA 1977). "When the PTO shows a sound basis for believing that the products of the applicant and the prior art are the same, the applicant has the burden of showing that they are not." In re Spada, 911 F.2d 705, 709, 15 USPQ2d 1655, 1658 (Fed. Cir. 1990). In the alternative, it would have been obvious for one of skilled in the art at the time to have captured and disseminating the information in real time as motivated by the need to reduce trading risk.
